SUBJECT INDEX, VOLUME 14

Titles of papers are given in italics

A Hitherto Undescribed Leaf Disease of Hevea Rubber Caused by a Species of Colletotrichum 11

American plantations :

- co-operative projects 309
- course of South American leaf blight 306

Ash concentration in *Hevea brasiliensis* lamina 262

Bark :

- anatomy, effect of yield stimulant 395
- renewal, effect of synthetic growth substances 362
- thickness, increase on application of yield stimulant 375

Bird's Eye Spot Leaf Disease of the Hevea Rubber Tree Caused by Helminthosporium Heveae 42

Bird's eye spot *(Helminthosporium heveae)*

- control 77
- culture medium 49
- disease resistance 67
- economic importance 44
- environment 68
- morphology of causal organism 47
- pathogenicity 55
- physiology of causal organism 49
- sporulation 56
- symptoms 44

Boron deficiency of *Hevea brasiliensis* 551

Brown bast, probable causes 390

Calcium :

- concentration in *Hevea* laminae 265
- deficiency in *Hevea brasiliensis* 529

Cercospora 42

Chemical composition of rubber plants 192, 209, 231, 257, 579

Chlorophyll and mineral contents of *Hevea* laminae 195, 222, 238, 261

Choline liberating enzyme in latex 173

Clonal latices, characteristics of 143

Clones :

and seedlings, exported to other countries 433

exchange of 426

export of exchange material from Malaya to Brazil and North America 436

information on *Dothidella*-resistant clones established in Malaya 440

re-exported from Malaya up to June 1955 446

RRIM seedlings collection 445

Coal Tar Fungicides for the Control of Mouldy Rot 449

I. *Testing of coal tar fungicides for the control of mouldy rot* 451

II. *The fungicidal properties of coal tar distillates :*

(i) *Investigation of the fungicidal efficiencies of components of coal tar distillates* 459

(ii) *Development of a method for coal tar fungicide analysis and a comparison between the chemical analysis of proprietary materials and their biological performance in the field* 472

Coal tar fungicides :

analysis 472

comparison between laboratory and plantation tests 460

field tests 454

fungicidal properties 459

investigation of efficiencies of components 459

method of bioassay 460

phytocidal tests 454

preparation method, effect on fungicidal properties 467

proprietary materials, comparison of biological performance 472

testing for control of mouldy rot 451

Colletotrichum :

germination of spores 13

leaf disease caused by species of 11

Copper :

acetate and sulphate, tree injection 399

deficiency symptoms in *Hevea* 557

sulphate as yield stimulant 399

Defoliant 179

Determination of Available Nutrients in Malayan Soils 109

Determination of Volatile Fatty Acids in Natural Rubber Latex 93

Disease :

Bird's eye spot 40

caused by a species of *Colletotrichum* 11

mouldy rot 449

South American leaf blight 287

Distillation :
macro scale (constant volume) 94
semimicro scale (total recovery) distillation 96

Dothidella resistant clones 311, 346, 432

Dothidella ulei see South American leaf blight

Dry rubber content of latex after treatment with yield stimulant 397

Enzyme *see* Choline

Factors Affecting the Measurement of Strain 149

Fertilisers (*see also* Plant nutrients) :
effect on stability of latex 133, 136
phosphate, added 126
phosphate availability in Malayan soils 109
phosphate manuring, probable response to 117
phosphate recovery 127
PK manuring, effect on latex stability 141
treatments, effect on
latex composition 140
mechanical stability 136

Formaldehyde, use of in development of volatile acids 415

Formic acid, determination of 98

Fractions from Hevea Brasiliensis Latex Centrifuged at 59,000g 163

Fungicides :
attempted control of South American leaf blight 312
coal tar for the control of mouldy rot 449
control of bird's eye spot 77
fungus inhibition by the components of proprietary fungicides 476

Growth of *Hevea brasiliensis :*
after yield stimulation 396
and nutrient deficiencies 209
in sand culture 183

Growth substances (synthetic), effect on yield (*see also* Yield stimulation) 362

Helminthosporium 42

Helminthosporium heveae 40

Hevea brasiliensis importation *see* Importation

Importation and Development of New Strains of Hevea brasiliensis by the Rubber Research Institute of Malaya 423

Importation and development of new strains of *Hevea brasiliensis* by the Rubber Research Institute of Malaya :

Dothidella resistant clones 424

exchange of clones 426

information on *Dothidella* resistant clones established in Malaya 440

Iron :

deficiency in *Hevea brasiliensis* 539

concentration in the lamina 265

Latex :

analysis 164

and volatile fatty acids 105, 407

commercial, volatile acid content 104

effect of fertilisers on stability 133

effect of soil conditions 135

fractions from *Hevea brasiliensis* centrifuged at 59,000g 163

lipin composition 170

phosphatide changes, storing 176

sample preparation, determination of volatile fatty acids 97

stability and mineral composition survey 133

Leaf :

blight, South American (*see also* South American leaf blight) 287

chemical composition 195, 222, 259, 579

disease of rubber caused by a species of *Colletotrichum* 11

Lipin, composition of latex 170

Magnesium :

concentration, nutrition of *Hevea brasiliensis* 250

deficiency in *Hevea brasiliensis* 515

Malayan soils *see* Soil

Manganese :
concentration in the lamina 266
deficiency in *Hevea brasiliensis* 547

Manures *see* Fertilisers

Measurement of strain 149

Mechanical stability of creamed latices (*see also* Latex) 134, 138

Minerals (*see also* Chemical composition) :
and chlorophyll content of the laminae 222
composition and stability of *Hevea* latex 133
concentration in the laminae 238
content determination of the plants and detection of contamination in water supplies 192
deficiences in *Hevea brasiliensis* 493

Molybdenum deficiency of *Hevea brasiliensis* 575

Mooney viscosity changes :
and purified rubbers 29
and weight changes, relationship between 28
effect of drying conditions during preparation 36
effect of storing RSS at low relative humidity 26
influence of sample thickness 26
in freshly prepared natural raw rubber : technological properties 33
sample preparations and test methods 21

Mooney Viscosity Changes in Freshly-Prepared Raw Natural Rubber 20

Mouldy rot, control of 449

New strains of *Hevea brasiliensis see* Importation and development of new strains of *Hevea brasiliensis* by the R.R.I.M.

Nitrogen :
concentration in *Hevea* lamina 262
deficiency of *Hevea brasiliensis* 497

Nutrients in Malayan soils, determination of available 109

Nutrition *see* Plant nutrition

Nutrition of Hevea Brasiliensis :
I. *Experimental methods* 183

II. *Effect of nutrient deficiencies on growth, cholorophyll, rubber and mineral contents of Tjirandji I seedlings* 209

III. *The interrelationship of magnesium, potassium and phosphorus* 231

IV. *Interclonal and seasonal variation in composition of leaves* 257

Packing house rubber, classification of 5

Parasite *see Helminthosporium*

pH, effect on germinating conidia of *Helminthosporium heveae* 54

Phosphate :

added in fertilised soils 126

availability in Malayan soils 109

problems in Malayan soils

discussion 128

studies of methods 123

Phosphatide changes on storing fresh latex 176

Phosphatides of Hevea Latex 169

Phosphorus :

concentration in the lamina 250, 262

deficiency of *Hevea brasiliensis* 509

effect on latex 141

in soils from experimental areas 124

Plantation establishment :

American 297

Bolivia 298

Brazil 298

British Honduras 300

British Guiana 299

Ceylon 313

Columbia 300

Costa Rica 350

Cuba 298

Dominican Republic 301

Dutch Guiana 307
Eastern countries 313
Ecuador 298
El Salvador 302
Far Eastern plantations 313
French Guiana 302
Guatemala 302
Haita 302
Honduras 303
India 314
Jamaica 303
Java 314
Malaya 314
Mexico 303
Nicaragua 304
Panama 304
Peru 305
Porto Rico 305
Trinidad 305
Venezuela 306

Planting material, administrative arrangements made for exchange 424

Plant nutrition (*see also Nutrition of Hevea Brasiliensis*) :
available in Malayan soils 109
boron content 277, 551
calcium content 227, 365
calcium in the lamina 265
copper 557
growth in sand culture 183
influence of certain nutrients on bird's eye spot 50
interclonal and seasonal variation in composition of leaves 257
iron concentration in the lamina 265
iron content 227, 265, 539
iron deficiency 539
magnesium content 226, 250, 267, 515
magnesium, potassium and phosphorus interrelationship 231
manganese content 277, 266, 547
mineral concentration in the laminae of *Hevea brasiliensis* 238

mineral contents of the lamina and chlorophyll of *Hevea brasiliensis* 222
mineral deficiencies 493
molybdenum deficiency 575
nitrogen 226, 262, 429
phosphate 113, 123
phosphorus 226, 250, 262, 509
potassium 109, 250, 251, 262, 266
potassium/magnesium concentration ratio in lamina of *Hevea brasiliensis* 267
rubber concentration in stems and petioles in *Hevea brasiliensis* 238
sulphur 226, 503
zinc 567

Poisoning of trees : use of 2,4,5-T 182

Potassium :
availability in Malayan soils 109
concentration in the lamina 250, 265
deficiency in *Hevea brasiliensis* 521
effect on latex 141

Processing quality and volatile acids 105

Purified rubbers and Mooney viscosity changes 29

Report on Technical Classification of Natural Rubber in Malaya 1

Rubber in the plant :
concentrations in stems and petioles of *Hevea brasiliensis* 238
concentration in the petiole of *Hevea brasiliensis* 259
content in stem and petioles of *Hevea brasiliensis* 221
in petiolar tissues, estimation of 197

Sand culture growth of *Hevea brasiliensis* 183

Seedlings :
and clones, export to other countries 433
importation of new strains 428
RRIM imported collection 431
Tjir 1 209

Soil :
analysis 114, 116
conditions, influence on stability and mineral composition of latex 135
factors in the environment with regard to *Helminthosporium heveae* 74
Malayan
determination of available nutrients 109
studies of the phosphate problem 121

South American Leaf Blight : A Review of the Literature Relating to its Depredations in South America, its Threat to the Far East and the Methods Available for Control 287

South American leaf blight *(Dothidella ulei) :*
anatomy of causal organism 293
climatic factors effecting disease in the East 316
control of 287, 349
disease resistance 295
dissemination 295
Dothidella resistant material 331
economic importance 293
environment 296
eradication 326, 349
fungicidal control of 349
geographical distribution 292
host reaction 295
infection 295
legislation 322
pathogenicity 295
physiology of causal organism 294
soil effect 318
symptoms 293

Spores :
germination of a species of *Colletotrichum* 13

Stability and Mineral Composition of Hevea Latex 133

Stability :
and mineral composition of *Hevea* latex 133
and V.F.A. 105, 407
of cream latices, mechanical 134

Stimulation of Yield in Hevea Brasiliensis :

I. *Pre-war experiments with vegetable oils* 355

II. *Effect of synthetic growth substances on yield and on bark renewal* 362

III. *Further observations on the effects of yield stimulants* 383

Stimulation of yield in *Hevea brasiliensis see* Yield stimulation

Strain measurement :

factors affecting 149

results obtained by rapid and normal tests 152

testing of specimens, preparation of compound and analysis of results 150

variation in, due to errors in the cross sectional area of the test specimen 157

Studies on the Phosphate Problem in Malayan Soils 121

Sugars present in the laminae of *Hevea brasiliensis*, determination of 202

Sulphur deficiency of *Hevea brasiliensis* 503

Tar acids and neutral oil distillates examination of 464

Tar oil analysis 473

Technical classification :

of consumers reaction 6

development in Malaya 3

of natural rubber in Malaya, a report on 1

of rubber, historical note on 2

supply of bulk shipments 4

The Analysis of Coal Tar Fungicides 482

Tree poison *see* 2,4,5-T

Truog values, comparison with values obtained by the fluoride extraction method 116

2,4-D 363, 383

2,4,5-T, use as :

defoliant 179

tree poison 182

weedkiller 180

yield stimulant 181, 383

Use of 2,4,5-T on Hevea 179

Visual Symptoms of Mineral Deficiencies of Hevea brasiliensis 493

Volatile Acids and the Quality of Concentrated Natural Latex 407

Volatile fatty acids in latex :
- and conductivity 413
- and processing quality 105
- and stability 409
- as index of decomposition 103
- content of commercial latex 104
- determination 93
- formation and development 102, 414
- purifying low grade concentrate 419
- use of formaldehyde 415

Vulcanisate, factors affecting the measurement of strain 150

Water supplies contamination, determination 192

Weedkillers, 2,4,5-T 181

Weight changes and Mooney viscosity changes 28

Yield :
- effect of synthetic growth substances on 362

Yield stimulation :
- and brown bast 347, 390, 402
- and clonal response 385
- application of stimulant above the tapping cut 374
- effect on trees previously affected by brown bast 402
- effect on latex 397
- growth after 396
- pre-war experiments with vegetable oils 355
- responses to oils 357
- scraping 356
- synthetic growth substances 362
- 2,4-D 363, 383
- 2,4,5-T 181, 383
- yield trend 297, 397

Zinc deficiency of *Hevea brasiliensis* 567
